RENEW YOUR ENERGY

CLEAN ENERGY CORPORATION AUSTRALIA IS A RENEWABLE ENERGY PROVIDER ACROSS AUSTRALIA FOR THE COMMERCIAL & INDUSTRIAL SECTORS.

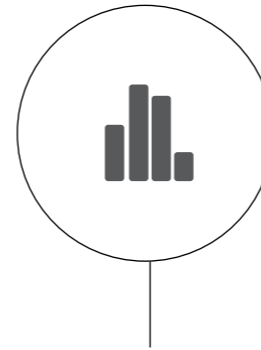

» EVERY SECOND, OUR SUN PRODUCES ENOUGH ENERGY TO SUSTAIN EARTH'S NEEDS FOR 500,000 YEARS. «

We provide a full service solution from initial scope, analysis, design, delivery through to ongoing maintenance. The clean energy sector is undertaking a significant change with volatile retail prices and reduction in delivery costs and materials Solar PV is becoming a strong business case. Renewable energy products vary for clients for supply and install through to Power Purchase Agreements and Leasing.

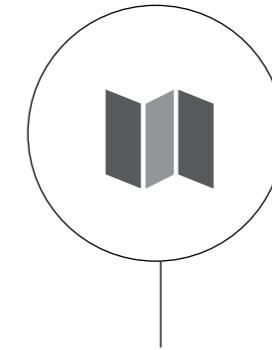

SOLAR PRODUCTS AND SERVICES

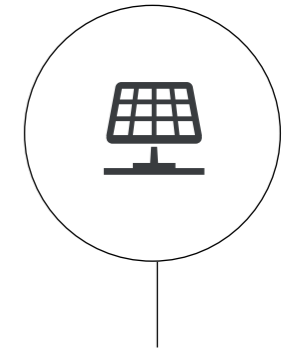

SOLAR FEASIBILITY

Detailed analysis of energy consumption and determination of whether a solar PV system is appropriate.

SOLAR DESIGN

Full specification of solar requirements for construction and delivery.

SOLAR EPC

Construction, delivery and maintenance of solar PV systems.

BENEFITS FOR ESD CONSULTANTS

Value Add and point of difference service for projects requiring or exploring solar PV options. Allows opportunity for Engineers and Consultants to present operational cost saving measures which can be realised immediately and further enhanced over medium and long terms. Accurate forecasting and cost planning of solar system capital investment.

CECA PARTNERSHIP

Clean Energy Corporation Australia works closely with Engineers and Consultants to identify suitable projects which will benefit from solar.

STAKEHOLDER ENGAGEMENT

Clean Energy Corporation Australia follows a process through education around the products available. Through this process and together with proper analysis, we are able to build the best financial objectives and understand operational concerns of the project. Our referral network sees it as a value add when providing advice to their clients, showing that they are looking comprehensively into ways to reduce operating costs and showing they are ahead of market trends.
