ENVIRONMENT**

OUR GUARANTEE

CLEAN ENERGY CORPORATION AUSTRALIA IS A RENEWABLE ENERGY PROVIDER.

We make clean energy available to customers at a lower cost than they would pay for energy otherwise generated by burning fossil fuels such as coal oil and gas.

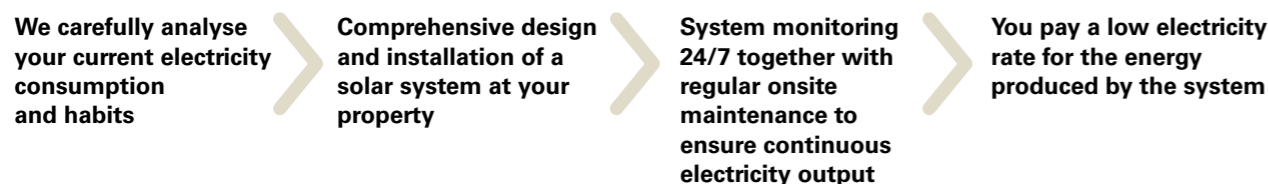

Our customers save money on their electricity costs from day one and accurately navigate any future increases by locking in lower electricity rates long term.

Our approach is to deliver a high quality clean energy alternative to our customers which is more affordable than their current energy option.

HOW WE SAVE YOU MONEY

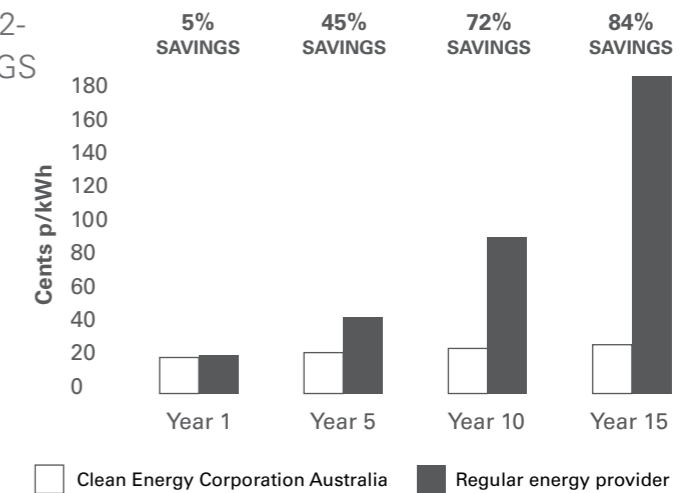

CLEAN ENERGY CORPORATION AUSTRALIA ALLOWS CUSTOMERS TO PURCHASE CLEAN ENERGY PRODUCED FROM SOLAR AND SAVE ON THEIR EXISTING ELECTRICITY COSTS

EXPECTED SAVINGS

WITH ELECTRICITY COSTS HAVING RISEN ON AVERAGE 18% DURING 2012-2013, WE OFFER SUBSTANTIAL SAVINGS IMMEDIATELY AND INTO THE FUTURE.

The combination of your payments to Clean Energy Corporation Australia and your reduced electricity bill will be immediately less than what you would normally pay to just your electricity provider without solar. In addition and most importantly, you secure your electricity rate with Clean Energy Corporation Australia long term whilst the rate offered by your existing electricity provider continues to rise.

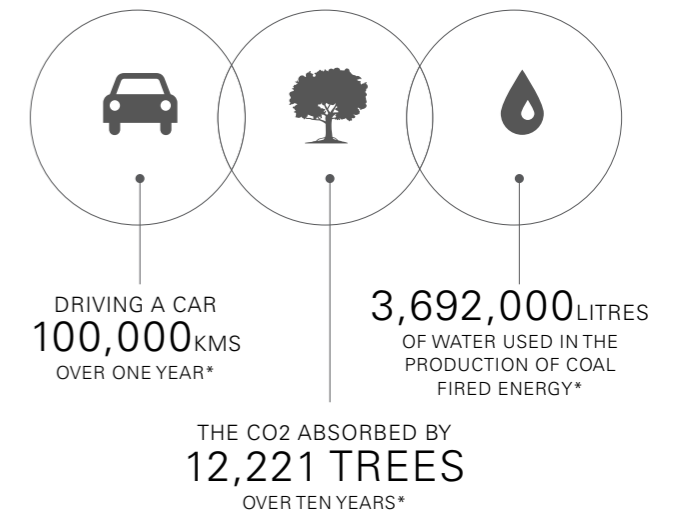

Yearly % increases represents a 15 year period. This allows an inculation of both real and forecast rate rise figures symbolising a reasonable indication of rate rise expectations over the next 15 years. Historical increases are an average of the CPRS-5, CPRS-15 and Garnaut-10, Garnaut-25 report findings.

HELPING THE ENVIRONMENT

UTILISING SOLAR WILL ALLOW YOU TO GENERATE ELECTRICITY WITHOUT PRODUCING HARMFUL GREENHOUSE GAS EMISSIONS AND OTHER FORMS OF POLLUTANTS.

A typical 100kW system benefits the environment by offsetting 130,000 kgs of carbon dioxide which is the equivalent of:

OUR GUARANTEE

We also guarantee the amount of electricity our systems produce so if the output falls below the quoted capacity over an annual period we'll pay you the difference. It is our goal to provide the best and most efficient systems and coupled with our ongoing monitoring, maintenance and customer service, your system is best positioned to outperform.

Clean Energy Corporation Australia is a proud member of the Clean Energy Council and follows the best practices as recommended by the National Electrical and Communication Association.
